Workshops:

S/PPRC Training *(Leader: Danny Kesner)*

We will review the guidelines for this work area and have a time for questions and discussion of real life situations in your local setting.

A Happier You: Managing Your Life More Effectively *(Leader: Judy Morris)*

We would all like to have less stress in our lives. We want our families to be happier. We want a happier life. Before becoming a pastor, I had worked in the corporate world for over 30 years. The nature of my job required me to be in crisis mode 90% of the time. Once I left the corporate world the pattern of being in crisis continued. Earlier this year I attended a class designed by Stephen Covey. That class changed my life. Come and hear how.

It's A Whole New Day! *(Leader: Jim Chandler)*

There is no denying that the world around us has changed. How we in the church respond to the change is what is truly important: we can either mourn that the past is gone, or we can embrace the exciting opportunities this new day brings. This workshop will explore some of those opportunities and share some best practices for reaching new people in our rapidly-changing world.

Being a Servant Leader in the Church Today *(Leader: Randy Orndorff)*

Leading in the church today requires a different set of skills than what were used 50 years ago. It requires more listening than telling, more conversation than assuming, more hands-on than "lording over" someone. It takes team work and building teams, It takes trust and open dialogue, mutual respect and mutual support. Leaders also have the hard work of growing and developing other leaders. Come learn a few skills and tidbits on how you can grow in your leadership and then help grow others in leading your church. To a large degree it's about disciples making disciples.

Church Audits *(Led by the Virginia Conference Treasurer's Office)*

Come learn about the local church audit process. What type of audit is best for your church? We will provide a step by step guide if your church would like to complete a self audit. We will also discuss the levels of CPA audits.
